

# MARIA CASSANDRA GUGOL

*Junior Full Stack Developer*

## PERSONAL BACKGROUND

Hello, There! I'm a junior web developer looking to embark on new adventures. I have been coding for the past few months in UC Irvine's Full Stack Development Bootcamp and graduate December 2, 2021. My current interests are improving my front-end skills to create better design and thinking about user experience.

Currently, I am a scientist for the veterinary field. I have worked with animals for almost 10 years, and am proud to continue to care for them and their owners by providing data to supplement treatment plans.
